May 8, 2009

To All Operators of 4D MEG Systems:

On behalf of the team here at MISL I would like to extend greetings to operators of 4D Neuroimaging MEG systems around the world.

As you are all likely aware, MISL acquired the assets of 4D Neuroimaging on April 14, 2009. Since that date, we have been fully engaged in the process of extracting the necessary service materiel from the 4D Neuroimaging San Diego facility and the establishment of a new office in Temecula, California (about 1 hour drive north of San Diego).

The first members of our service team who will be focused on 4D customer service are Mr. Joseph (Joe) Whetsel and Mr. Richard (Rick) Orr who will be based at our Temecula office. We plan on expanding the number of our service personnel to include engineers in Europe in the very near future.

MISL is committed to providing the highest level of sustainable service to the MEG community. For the past 2 years, MISL has enjoyed a strong relationship with its service customers and we were recently pleased to announce the manufacture of new MISL MEG systems to meet growing demand worldwide.

We have received many requests for information on MISL service contracts and we have been rapidly adapting our standard agreement structure to accommodate the specific needs of 4D system operators. We have provided access to the pro forma contracts on our website. Links to the contract documents will be provided in an accompanying message.

I look forward to hearing from each of you and developing positive and long term relationships upon which the future potential of MEG exploration and application will be built.

Yours truly,

Tim Baird
General Manager
MEG International Services Ltd.
